Hi Tom

My suggestion would be to set a meeting date of December 18th and make it an regular planning commission meeting, gives you plenty of time to post.

Hi Everybody. I just spoke to Frank from Ranger Power Wednesday of last week and he let me know the time frame they are on. They intend to file paper work for us to take it up as an action item in February. I think we should meet unofficially to discuss any questions we might have or things we have concerns about and produce a list of "conditions" for the Conditional Use Permit. We can meet tomorrow if you all like, or honestly anytime this month. Whatever works best for your schedules. I am so buried in the weeds at work that no time is any worse than another.

So, we need to have an unofficial get together this month in order to have a plan for a January meeting that we will post notices for and invite public discussion. Ranger Power folks will be present to address questions at that meeting. Then, we will have a take action item for a February meeting. I think it is OK at this point to have Phil and Josh involved in this initial discussion, and I will get clarification from the Towns Association for how to proceed after that.

Let me know what your thoughts are on when to get together. Thank you.

Are we still meeting this week for the Ranger Power information?

Thanks

Josh

Hi guys. A reminder we will need to have a meeting next Wednesday to discuss this CSM. This should be a pretty straight forward one.

We may also be discussing the Ranger Power/Western Mustang Solar CUP. I am meeting with some of their reps later today to get more info from them about their process and project. I got a feeling they may be asking for a hearing next week. I would prefer to push it back to December to give us all more time to develop our questions about any concerns. It is probably a good idea to begin making yourselves as familiar as possible with the project and gathering your questions or concerns. [Western Mustang Solar | A Ranger Power Project](#)
