Thanks for the phone call Tom,

I will write down some of my thoughts and send them over to you.

Thanks for all your time on this. We really need to push to get the best deal as it will be the bench mark for future projects like this.

Hey Tom,

I am not up on Roberts rules of order but I think it would be nice for those voting on the measure to get together and compair notes on what we would like to add or modify in the conditional use for the solar project. If we were to met at my house is that considered a quorum? Or should we each just write them down and send them to you.

Keith
